RE: Addendum to Prism Farms Biomass Heating Project Verification Report

Dear Iva,

Please accept the following as an addendum to the Verification Report, version 1.0, dated June 7, 2016, regarding GHG Clean Projects™ Registry Biomass to Energy Voluntary Offset Project Prism Farms (Project ID 3717-3949).

If you have any questions on this addendum, please contact Jennifer Packer at 403-589-6822 or Jenn@PackerConsulting.com.

Sincerely,

Jennifer Packer, P.Eng.

1. GHG Registry Findings for Verification Report Submission

1.1 Verification Statement

The issue raised by GHG Registries in the Verification Statement is that the GHG assertion has to be separated by greenhouse gases as is in the GHG Report. Please accept the following update to the existing GHG assertion in the Verification Statement.

Existing statement:

“The GHG Assertion specifies a claim of 5,117 tCO₂e of emissions reductions over the aforementioned period resulting from the diversion of biomass to energy from biomass combustion. The emissions reductions include the offset of the following greenhouse gases; CO₂, CH₄, and N₂O.”

Revised statement:

“The GHG Assertion specifies a claim of 5,117 tCO₂e of emissions reductions over the aforementioned period resulting from the diversion of biomass to energy from biomass combustion. The emissions reductions include the offset of the following greenhouse gases: 3,257.8 tCO₂, 76.3 tCH₄, -0.1 tN₂O and - 4.2 tCO₂e.”

1.2 Project Contacts

The issue raised by GHG Registries regarding contact information on Page 3 of the Verification Report is that Blue Source is listed as Project Developer, not Authorized Project Contact. Please accept the following update to the contact info on page 3.

Existing Contact Information:

1.3 Appendix A – Verification Plan

The issues raised by GHG Registries regarding the Introduction section of Appendix A – Verification Plan are that the GHG assertion period is incorrect and Blue Source is again listed as Project Developer instead of Authorized Project Contact. Please accept the following revisions:
